PROJECTS

SEANRITTER.COM
www.seanritter.com
Ruby on Rails, HTML5, CSS, Javascript, Bootstrap

A self-contained, full-stack, Ruby on Rails page serving as a personal portfolio and contact page. Visitors can submit a contact form notifying the administrators personal email with the contents of their message. This page also offers administrative options giving the administrator full access to content creation as well as contact information of page visitors.

LIVEDIET
www.livediet.herokuapp.com
Ruby on Rails, HTML5, CSS, Javascript, PostgresQL, Bootstrap

A full-stack, Ruby on Rails social media mockup designed to allow users to anonymously, yet publicly, create and compare diet plans giving users a broader selection of plans with user results and ratings. Users subscribe to plans and track their weight. All loss or gain is attributed to the current plan they are subscribed to and tracked accordingly. This data is used to visualize the average effectiveness of diet plans across a broad spectrum of users allowing new users to find a plan that may be beneficial to them.
